

WOMEN IN CYBERSECURITY:

..... A CAREERS SUMMIT

Employers are looking to fill jobs in the rapidly growing field of cybersecurity. It offers high salaries, career security, and promotion opportunities, and yet has a talent gap and a diversity gap, with women and minority groups underrepresented. Join us as industry executives and members of the FBI's Cyber Branch hold a panel discussion on the leading role women can play in the cybersecurity field, with an emphasis on cyber careers in the FBI.

MONDAY | APRIL 16, 2018
