Samuel Sultan CIS Spring 2025 CISC3500 R01- Database Systems No. of Students: 27

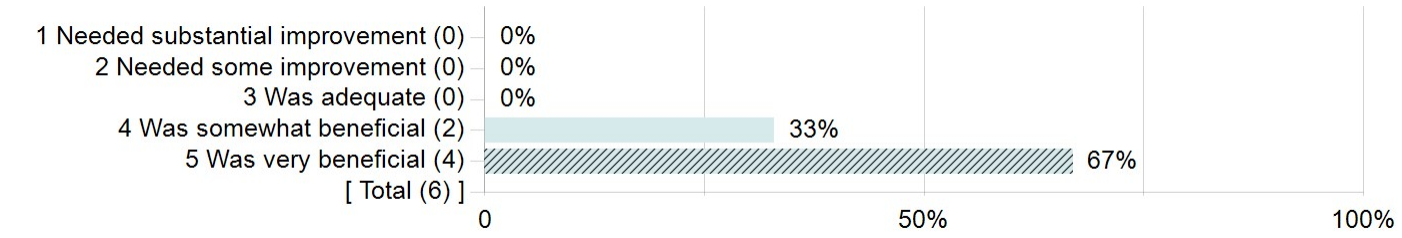

How did you support your own learning?

1. My attendance and engagement during class time

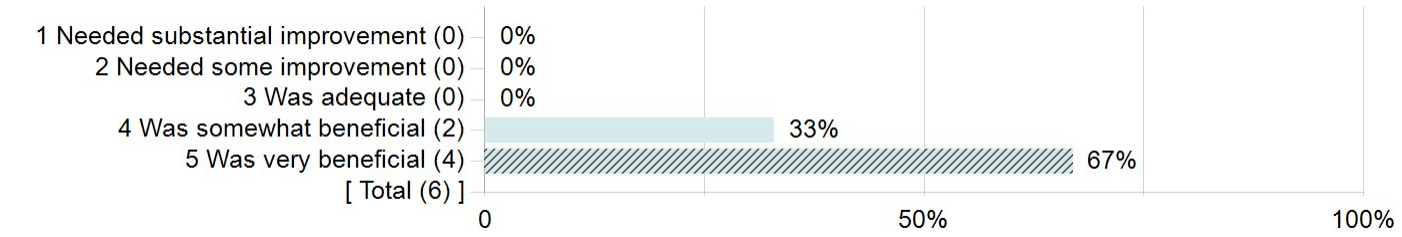

Statistics	Value
Response Ratio	22%
Median	5

2. The time I spent on this course outside of class

Statistics	Value
Response Ratio	22%
Median	5

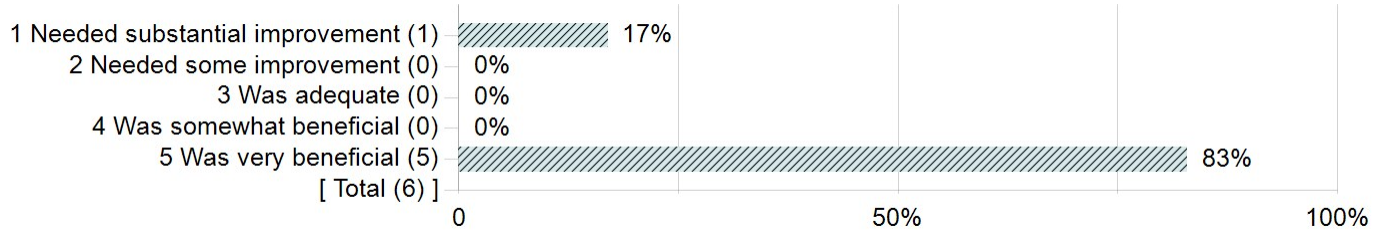

3. My response to instructor feedback

Statistics	Value
Response Ratio	22%
Median	5

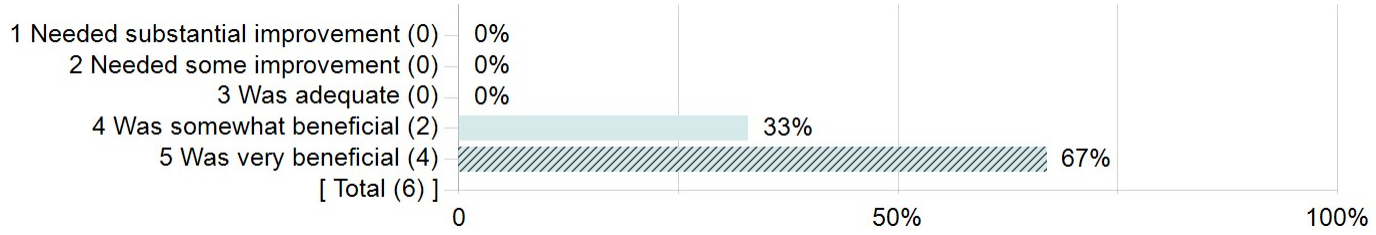

How did the instructor support your learning?

1. The welcomeness and inclusiveness of the learning environment

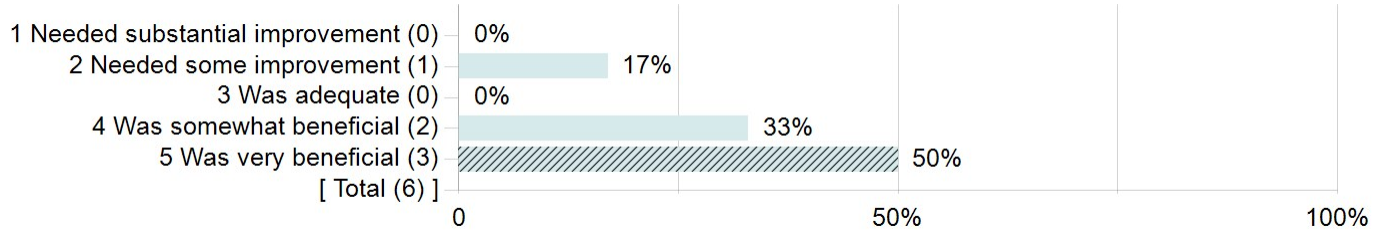

Statistics	Value
Response Ratio	22%
Median	5

2. The preparation and organization of course content

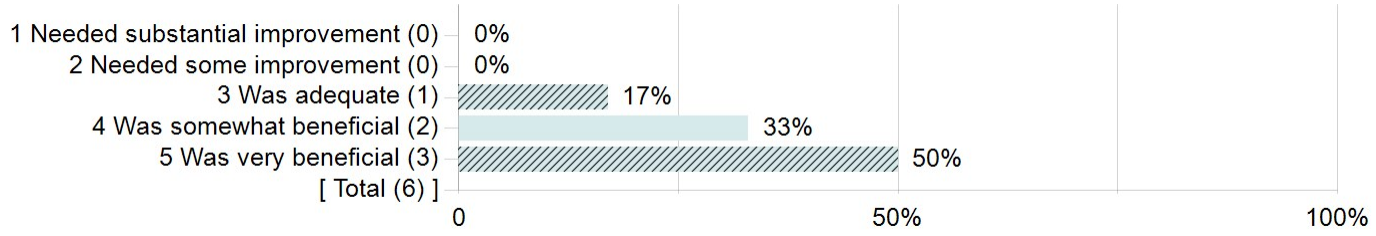

Statistics	Value
Response Ratio	22%
Median	5

3. The clarity of the instructor’s explanations of the course content

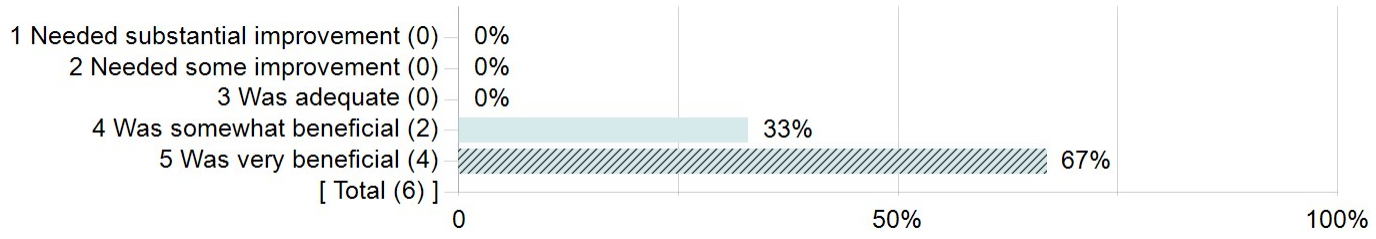

Statistics	Value
Response Ratio	22%
Median	5

4. The instructor's timeliness and methods of evaluating and/or providing feedback on student work

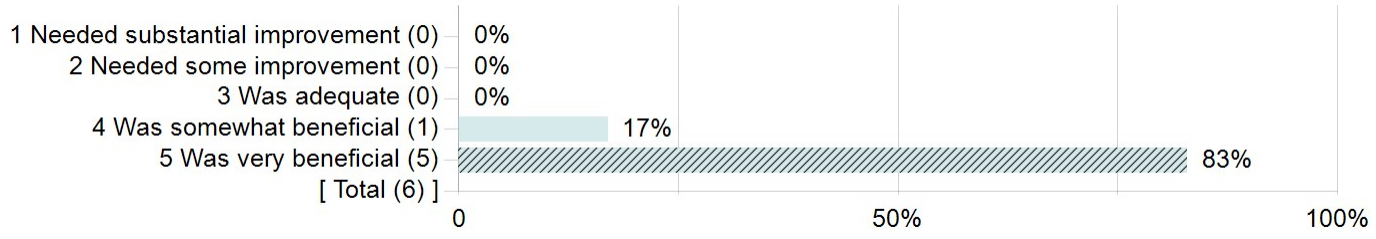

Statistics	Value
Response Ratio	22%
Median	5

5. The opportunities for students to ask questions, share, and/or actively participate

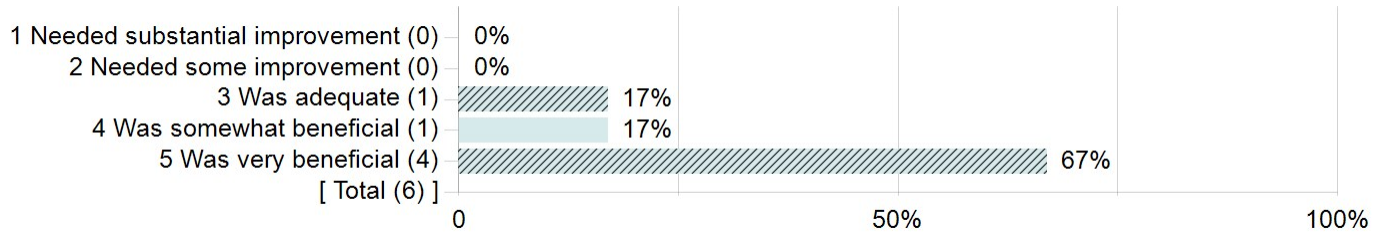

Statistics	Value
Response Ratio	22%
Median	5

6. The number and breadth of topics covered in the course

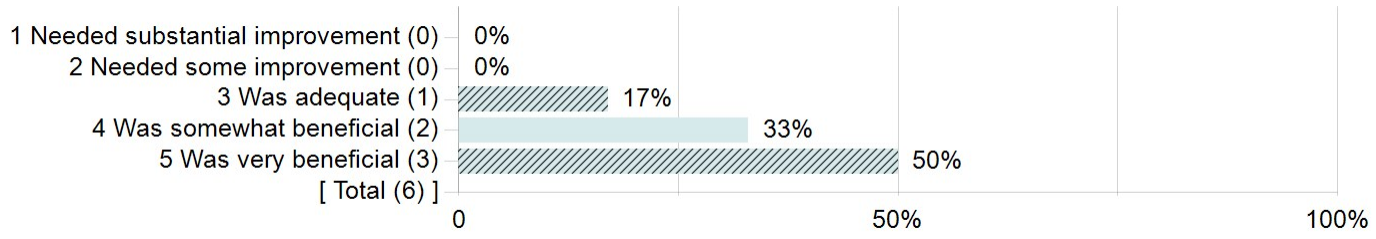

Statistics	Value
Response Ratio	22%
Median	5

7. The level of intellectual challenge posed by the course content

Statistics	Value
Response Ratio	22%
Median	5

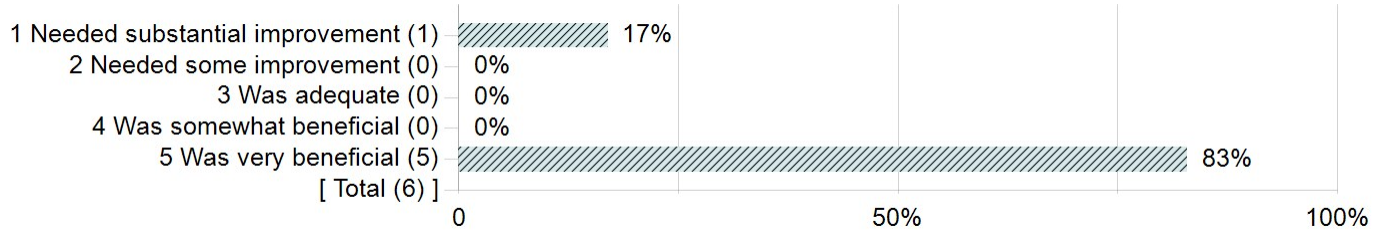

8. The number and types of assignments/examinations

Statistics	Value
Response Ratio	22%
Median	5

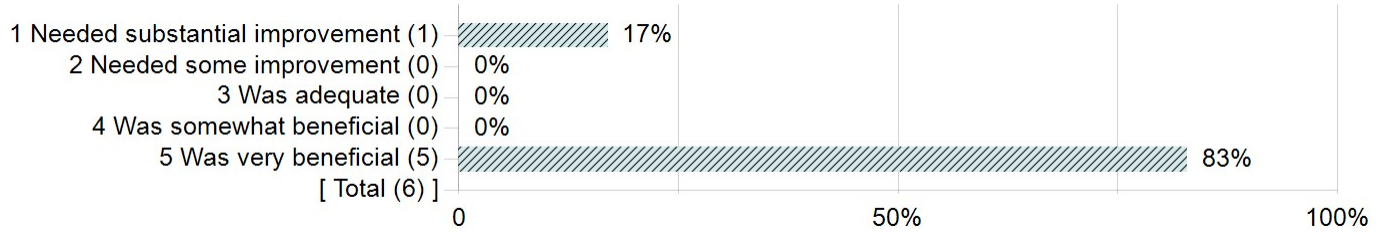

Overall, how well did each of the following support your learning?

1. Overall, how well did this instructor support your learning in this course?

Statistics	Value
Response Ratio	22%
Median	5

2. Overall, how well did this course contribute to your learning at Fordham?

Statistics	Value
Response Ratio	22%
Median	5

What aspects of this course were most beneficial to your learning?

Comments
I enjoyed the explanations and time the professor put in to making sure students understood the concepts from class. He is clearly very knowledgeable and it showed through his course planning and explanations.
lectures and notes
The amount of content made available to students helped very much.
The notes were beneficial but hard to gauge what would be expected to know for exams/homework due to their length and density.

What aspects of this course could most have used improvement to help your learning?

Comments
I think the final project was a lot of work, and it was difficult to complete with assignments from other classes as well. Also, he added some requirements for it towards the end of the semester and I wished they had been there at the beginning.
nothing
Although the assignments helped understanding the course content I believe the assignments would better help if they were done in class or as part of the class (lab time for example) as having too many assignments sometimes take too much time (time needed for other different course assignments)
Lecture style was very problematic. Instructor constantly yelled and belittled students rather than trying to assist in intellectual development. Students were punished for not learning what the instructor deemed to be fundamental and obscure jargon was used to describe things. Questions were never quite answered and tangents were common. Additionally, the TA graded very harshly with little to no explanation of why answers provided were incorrect.
